INTERNAL AUDIT

The Group's internal audit is handled by the Company's Internal Audit unit, which reports to the President and CEO.

The purpose of the Internal Audit is to analyse the Company's operations and processes and the effectiveness and quality of its supervision mechanisms. The unit assists Finnlines to accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of the internal control and governance processes. The Internal Audit unit carries out its task by determining whether the Company's risk management, internal control and governance processes, as designed and represented by the management, are adequate and functioning in a manner to ensure that:

- Risks are appropriately identified and managed.
- Interaction with the various governance groups occurs as needed.

- Significant financial, managerial and operating information is accurate, reliable and timely.
- Employees' actions are in compliance with policies, standards, procedures and applicable laws and regulations.
- Resources are acquired economically, used efficiently and adequately protected.
- Programs and plans are properly implemented and objectives are achieved.
- Quality and continuous improvement are fostered in the Company's internal control processes.
- Significant legislative or regulatory issues impacting the Company's internal controls are recognised and addressed appropriately.

The head of the Internal Audit unit prepares an annual plan using an appropriate risk-based methodology and taking into consideration potential risks or control concerns identified by the management. The scope of the audits within a fiscal year is planned so that it is representative and the focus is set on the business areas with the biggest risk potentials. The plan is approved by the President and CEO. The internal auditor also carries out special tasks assigned by the Chairman, the President and CEO or the Board of Directors.

The internal auditor conducts the internal audits independently from operational units. In his auditing work the auditor complies with the corporate governance, ethical principles, policies and other guidelines of the Company.

The audit reports are sent to the President and CEO and the CFO. The President and CEO and the CFO have at least once a year a closed session with the head of Internal Audit unit about the results of the conducted audits and the plans for the next period. Relevant issues are also brought to the attention of the Board of Directors.

INTERNAL CONTROL OVER THE FINANCIAL REPORTING

Monitoring is a process that assesses the quality of Finnlines' system of internal control and its performance over time. Monitoring is performed both on an ongoing basis, and through separate evaluations including internal, external and quality audits. The business unit is responsible for ensuring that relevant laws and regulations are complied with in their respective responsibility areas.

The Internal Audit function assists the President and CEO and the Board of Directors in assessing and assuring the adequacy and effectiveness of internal controls and risk management by performing regular audits in the Group's legal entities and support functions according to its annual plan. Finnlines' external auditor and other assurance providers such as quality auditors conduct evaluations of the Company's internal controls.

The Company's financial performance is reviewed at each Board meeting. The Board reviews all interim and annual financial reports before they are released. The effectiveness of the process for assessing risks and the execution of control activities are monitored continuously at various levels. This involves reviews of results in comparison with budgets and plans. Responsibility for maintaining an effective control environment and operating the system for risk management and internal control of financial reporting is delegated to the President and CEO. The internal control in the Company is based on the Group's structure, whereby the Group's operations are organised into two segments and various business areas and support functions. Group functions issue corporate guidelines that stipulate responsibilities and authority, and constitute the control environment for specific areas, such as finance, accounting, and investments, purchasing and sales.

The Company has a compliance program. Standard requirements have been defined for internal control over financial reporting. The management expects all employees to maintain high moral and ethical standards and those expectations are communicated to the employees through internal channels.

The Group Finance & Control unit monitors that the financial reporting processes and controls are being followed. It also monitors the correctness of external and internal financial reporting. The external auditor verifies the correctness of external annual financial reports.

The Board monitors the statutory audit of the financial statements and consolidated financial statements, evaluates the independence of the statutory auditor or audit firm, particularly the provision of related services to the Company and prepares the proposal for resolution on the election of the auditor.

The Board reviews annually the description of the main features of the internal control and risk management systems in relation to the financial reporting process, which is included in this Corporate Governance Statement.
